Stone Countertops Care & Maintenance

Granite and Quartz countertops require very little maintenance and are easy to care for.

- Quartz countertops do not need sealing.
- Granite should be sealed if water does not bead up.

AKEMI is the penetrating sealer we use. Follow directions.

Helpful Tips:

- Clean with warm water and soap.
- For deeper cleaning (always rinse and wipe dry after use):
 - Soft Scrub Liquid Gel with Bleach, 409, Fantastic, or equivalent
 - Denatured Alcohol
 - 50/50 combination vinegar and water
- Clean up spills to avoid staining.
- Cutting on stone counters will dull your knives and cutting boards are suggested.
- Trivets are recommended for hot pots.
